

Provider Orientation

1) Logon / logoff Change password Chalkboards

2) Areas of screens / views

Menu bar, patient banner, quick keys

3) Admit / H&P (radio buttons – single choice, squares – multiple options, open box – free tx)

FHR tracing – active scrolling, can trend back if needed

Side buttons are data entry buttons @ top, middle is review & data entry, lower are review. If item is "greyed out" not able to change.

Admission button opens history box >>> informed consent or PE & fetal assessment.

Current & update are available

H&P history box scrolls down & anything noted by RN shows in red

NST form – scrolls strip – Area to enter results & pt name for verification

Baby B in bottom right

4) Progress note – buttons to view strip across top

Top button for labor progress note – may change time if needed, area for free text
Provider may input own SVE here, AROM etc.

Bottom left buttons again are for review.

RN IP assess. – can see what IV is running & when started

VS graph - PIH pt & want to see graph of B/P's...pt developing a temp...

5) Delivery – vag

EBL, epis or laceration, sponge count (RN's will state per provider- they verify),
area for notes about anything unusual,

Baby A/ Baby B – area for vacuum & shoulder dystocia

6) Delivery - C/S

EBL, complications, indications, incision, again an area for notes

7) PP progress

8) Discharge – notes

Can input under the comments section about any Rx given
